This unique book covers fundamentals of organolithium compounds and gives a comprehensive overview of the latest synthetic advances and developments in the field. Part I covers computational and spectroscopic aspects as well as structure-reactivity relationships of organolithiums, whereas Part II deals with new lithium-based synthetic methodologies as well as novel synthetic applications of functionalized lithium compounds. A useful resource for newcomers and active researchers involved in organic synthesis, whether working in academia or industry!

CONTENTS

PART I: NEW STRUCTURAL ASPECTS OF LITHIUM COMPOUNDS
1. Structure-Reactivity Relationship in Organolithium Compounds (E. Carl, D. Stalke; University of Göttingen, Germany)
2. Computational Perspectives on Organolithiums (S.O. Nilsson Lill; University of Gothenburg, Sweden)
3. Spectroscopic Advances in Organolithium Reactivity: The Contribution of Rapid-Injection NMR (RINMR) (A.C. Jones; Wake Forest University, USA)
4. Spectroscopic Advances in Structural Lithium Chemistry: Diffusion Ordered Spectroscopy and Solid State NMR (M. Sebban, L. Guilhaudis, H. Oulyadi; University of Rouen, France)
5. Mixed Lithium Complexes: Structure and Application in Synthesis (R.E. Mulvey, C.T. O’Hara; University of Strathclyde, UK)

PART II: NEW SYNTHETIC METHODOLOGIES BASED ON LITHIUM COMPOUNDS
6. Oxygen-bearing Lithium Compounds (F.M. Perna, A. Salomone, V. Capriati; University of Bari “Aldo Moro”, Italy)
7. Nitrogen-bearing Lithium Compounds (L. Degennaro, B. Musio, R. Luisi; University of Bari “Aldo Moro”, Italy)
8. Sulfur-bearing Lithium Compounds (J.L. García Ruano, A. Parra, J. Alemán; Autonomous University of Madrid, Spain)
9. Phosphorus-bearing Lithium Compounds (F. López Ortiz; University of Almeria, Spain)
10. Advances in the Chemistry of Chiral Lithium Amides (A. Harrison-Marchand, J. Maddaluno; University of Rouen, France)
11. Advances in Carbolithiation (Y. Minko, I. Marek; Israel Institute of Technology, Israel)
12. Reductive Lithiation and Multilithiated Compounds in Synthesis (U. Azzena, L. Pisano; University of Sassari, Italy)
13. Dearomatiation and Aryl Migration in Organolithium Chemistry (J. Clayden, University of Manchester, UK)
15. Lithiated Azaheterocycles in Modern Synthesis (Y. Fort, C. Comoy; University of Lorraine, France)
16. Lithium Compounds in Cross-Coupling Reactions (M. Shimizu; Kyoto Institute of Technology, Japan)
17. Microreactor Technology in Lithium Chemistry (A. Nagaki, J.-i. Yoshida; Kyoto University, Japan)
18. Practical Aspects of Organolithium Chemistry (L. Degennaro, A. Giovine, L. Carroccia, R. Luisi; University of Bari “Aldo Moro”, Italy)
